

## Clarity Quick Tips - Clarity Office Anywhere Mobile App

# Using the Mobile App to Dial Out with Your Business Caller ID

In today's mobile world, our businesses need to be mobile too.

Have a field technician or remote user who needs to call out to a customer? Have them use the Mobile App to call the customer from their cell phone.

When the Mobile App is used to call outbound, your customer will see your business Caller ID, increasing the likelihood that they will answer the call.

The Mobile App also allows its Users to Text, Transfer, and Conference calls, right from the App.

And, as a bonus, inbound return calls from your customer will dial back to your Office, allowing you to direct calls to the right person, every time.

Our Mobile App is available for both IOS and Android phones and can be configured to run off your data or cellular connection.

### Get Started!

1. Download the Clarity Office Anywhere Mobile App from your Google Play or Apple App Store.
